

## National Service Warranty Enrollment Guidelines

### Build Your Customers Trust With A National Service Warranty!

You can now offer your customer a national parts and labor repair warranty that will guarantee your work on covered parts and labor for 12 months or 12,000 miles from the time of original repair when your customer travels more than 25 miles from your business. This is an excellent

tool to help you give your customer added confidence. If a mechanical problem should occur, the national warranty will stand behind the repairs made. This “peace of mind” will help further increase the trust and loyalty your customer has to your business.

If your customer is within 25 miles of your location and has a mechanical breakdown, they return to your location for any warranty service. If your customer is traveling more than 25 miles from your location and has

a mechanical breakdown, the customer calls a toll-free number and they will be directed to the nearest participating repair facility. The WarrantyBAY plan pays for the parts and labor for their covered claims up to the cost of the original repair. You will receive a letter letting you know that your customer had a covered repair. You will not be charged back for the parts and labor on any covered claim. This warranty is accepted at over 20,000 locations nationwide.

### Start building increased customer confidence today!

## National Service Warranty Location Enrollment

*Please complete for each participating location*

I have read and understand the WarrantyBAY National Service Plan guidelines above. Please sign me up for this program. I agree that...

- I will provide each and every customer with a WarrantyBAY warranty document so they have our nationwide toll free number to call.
- I will assist the warranty provider by servicing out-of-town warranty consumers.

Please add me to your database to provide roadside assistance. (Optional)
